

SPEEDWAY

Custom Conveyor

The Speedway conveyor has a modular design which allows for the flexibility to provide a wide range of configurations.

These straight line conveyors are constructed from stainless steel and anodized aluminum. They come with stainless steel threaded leveling feet, guide rails, and plastic modular belting. The variable speed motor allows speed matching with other existing equipment.

This conveyor is self contained needing only AC power and can be used as a stand alone or integrated into your existing line.

Manufactured in Canada by:
Speedway Packaging Machinery Inc.
